

LYDELL PURIFOY

 yrnskypa@gmail.com

 61103, Rockford IL

PROFESSIONAL SUMMARY

Dedicated and results-driven AI Trainer, Prompt Engineer, and Data Analytics Specialist with over four years of experience evaluating Large Language Models (LLMs), designing high-quality prompts, improving AI-generated responses, and delivering business-focused analytical solutions. Proven ability to optimize AI performance through structured testing, quality assurance, prompt refinement, and data-driven decision-making. Experienced in remote collaboration, business intelligence, data visualization, and technical problem solving. Recognized for analytical thinking, exceptional attention to detail, continuous process improvement, and consistently delivering high-quality results within deadline-driven environments.

CAREER HIGHLIGHTS

- Extensive experience evaluating and improving Large Language Models (LLMs)
- Expertise in Prompt Engineering and AI Response Optimization
- Strong knowledge of AI Quality Assurance and Model Evaluation
- Experience designing structured evaluation frameworks and scoring rubrics
- Skilled in Data Analytics, Business Intelligence, and Reporting
- Proficient in Python, SQL, Excel, Power BI, and Tableau
- Strong analytical and critical thinking abilities
- Experience in Natural Language Processing (NLP) fundamentals
- Ability to transform complex technical findings into actionable business insights
- Excellent research and data interpretation skills
- Strong stakeholder communication and cross-functional collaboration
- Experience working independently in remote environments
- Highly organized with exceptional time management skills

PROFESSIONAL EXPERIENCE

Remote AI Training Projects - AI Trainer & Prompt Engineer

Rockford, Illinois • 2023 - Current

- Lead AI prompt engineering initiatives to evaluate reasoning, factual accuracy, clarity, and communication quality across Large Language Models.
- Design structured prompts that improve AI performance and response consistency.
- Evaluate AI-generated outputs using detailed scoring rubrics and quality assurance frameworks.
- Build evaluation methodologies that measure relevance, coherence, logical reasoning, and factual correctness.
- Collaborate with remote AI teams to improve model performance through continuous testing and refinement.
- Maintain quality standards across multiple AI evaluation projects while meeting strict deadlines.
- Conduct research to improve prompt effectiveness and model understanding.
- Analyze evaluation results and provide actionable recommendations that improve AI-generated responses.

Remote AI & Data Projects - AI Prompt Engineer & LLM Evaluation Specialist

Rockford, Illinois • 2022 - 2023

- Designed advanced prompts for business communication, reasoning, and analytical tasks.
- Evaluated and ranked AI-generated responses using structured evaluation guidelines.
- Collaborated with cross-functional teams to improve AI communication quality.
- Conducted research that enhanced contextual understanding and response accuracy.
- Improved enterprise AI outputs through prompt optimization and continuous quality improvement.
- Maintained consistency across AI evaluation projects while ensuring adherence to quality standards.
- Supported ongoing AI model training through detailed feedback and performance analysis.

- Strong facilitation and presentation abilities
- Excellent written and verbal communication
- Leadership in AI quality improvement initiatives
- Process improvement and continuous optimization mindset
- Knowledge of Agile methodologies, Scrum, Kanban, and SDLC environments
- Familiarity with Jira, Confluence, Microsoft Office Suite, Miro, and collaborative project management tools
- Strong problem-solving and decision-making abilities
- Experience maintaining quality standards across multiple AI evaluation projects
- Artificial Intelligence
- Prompt Engineering
- Prompt Optimization
- Large Language Model (LLM) Evaluation
- AI Response Evaluation
- AI Quality Assurance
- AI Training Support
- AI Model Testing
- AI Content Review
- Prompt Design Frameworks
- Data Annotation
- Response Ranking
- Evaluation Rubrics
- AI Performance Improvement
- Natural Language Processing (NLP)
- Data & Technical Skills
- Python Programming
- SQL
- Microsoft Excel
- Power BI
- Tableau
- Data Cleaning
- Data Preparation
- Dashboard Development
- Data Visualization

Rockford Data Solutions - Data Analyst (Contract)

Rockford, Illinois • 2021 - 2022

- Analyzed complex datasets to identify trends, business opportunities, and operational improvements.
- Developed dashboards and business reports using Microsoft Excel and Power BI.
- Converted raw business data into meaningful visualizations and executive summaries.
- Collaborated with stakeholders to provide accurate reporting for strategic decision-making.
- Cleaned, validated, and prepared datasets for business analysis.
- Improved reporting accuracy through data verification and quality assurance.
- Delivered analytical insights that supported business growth and operational efficiency.

PROJECT HIGHLIGHTS

LLM Evaluation Framework Development, Developed structured evaluation frameworks for assessing AI-generated responses., Improved consistency, logical reasoning, factual accuracy, and response quality., Designed scalable scoring systems used to evaluate model performance., AI Business Communication Optimization, Enhanced professionalism, readability, and clarity of AI-generated business communications., Reduced response errors through prompt optimization strategies., Improved overall AI communication effectiveness., Data-to-Insight Reporting, Built business dashboards and visual reports using Power BI and Excel., Converted complex datasets into executive-level reports and actionable recommendations., Improved reporting efficiency through data visualization and business intelligence techniques.

TOOLS & TECHNOLOGIES

- Python
- SQL
- Microsoft Excel
- Power BI
- Tableau
- ChatGPT
- Prompt Design Frameworks
- Data Annotation Platforms
- Visualization Tools
- Microsoft Office Suite
- Jira
- Confluence
- Miro

WORK STYLE

- Remote & Asynchronous Work
- Flexible Availability
- Independent Task Management
- Detail-Oriented Execution
- Deadline-Driven Performance
- Continuous Learning
- Process Improvement

- Statistical Analysis
- Business Intelligence
- Data Reporting
- Research Analysis
- Professional Skills
- Agile Methodologies
- Scrum
- Kanban
- SDLC Fundamentals
- Leadership
- Coaching
- Mentoring
- Facilitation
- Conflict Resolution
- Stakeholder Management
- Cross-functional Collaboration
- Continuous Improvement
- Process Optimization
- Analytical Thinking
- Critical Thinking
- Business Communication
- Executive Summary Writing
- Problem Solving
- Time Management
- Attention to Detail
- Remote Collaboration
- Independent Workflow Management
- Quality Assurance
- Reporting
- Microsoft Office Suite
- Jira
- Confluence
- Miro

- Cross-functional Collaboration
- High Professional Standards
- Commitment to Quality

EDUCATION

Rockford University

Rockford, Illinois • 01/2021

Bachelor of Science: Computer Science

Graduated: 2021

CERTIFICATIONS

- Professional Development in Prompt Engineering
- Large Language Model (LLM) Evaluation Training
- AI Quality Assurance Training
- Business Intelligence & Data Analytics
